Summary

Summary

Nairobi, Kenya

Summary

Results-driven software engineer with 3+ years of experience designing and implementing cutting-edge software solutions. Highly skilled in frontend development, with expertise in JavaScript (React JS and Node JS), Bootstrap, Material UI and Tailwind CSS. Proven track record of delivering high-quality software products on time and within budget. Experienced in working with cross-functional teams to identify requirements, design solutions, and implement features. Passionate about staying up-to-date with the latest technologies and trends in software development

Experience

Frontend Developer

Yellow Pages Kenya

Jan 2023 - Present (4 months)

Wrote clean and dynamic code in JavaScript (React and NodeJS)

- Established rigorous version control framework in GitHub.
- Planned and created version 1.0 of an internal landing page generating tool using React and NodeJS. The tool auto-deploys the app into an internal company server.
- Created a user interface and integrated the API for the Yellow pages listing directories site using React, Node and MySQL.
- Resolved Jira tickets with comprehensive bug fixes

Software Engineer

ZUMI

May 2022 - Jan 2023 (9 months)

Worked as a frontend developer with a team to build a B2B ecommerce platform using ReactJS, NodeJS and MySQL.

- Developed and maintained unit and integration tests to ensure the application is working as expected.
- Optimized the application's performance by identifying and fixing bottlenecks in the code and database.
- Designed and implemented new features and enhancements to the application, including integrations with external APIs.
- Resolved Jira tickets with comprehensive bug fixes.
- Coded software updates to add new features, close security holes and resolve defects.
- Harnesses Agile project management to develop top-quality an internal CRM for the organization.
- Worked with redux and context state management tools to ensure a smooth maintenance of state in the applications.
- Maintained a Python application coded in Flask framework.

Web Developer

Stycohub - Kenya

May 2020 - Dec 2021 (1 year 8 months)

Styco-hub Kenya

Created landing pages and websites using WordPress, Laravel and CodeIgniter PHP frameworks

- Created frontend applications using ReactJS as per client requirements.
- Pushed my code to GitHub for review by my seniors.
- Utilized wireframes, storyboards, user flows, process flows and site maps to present design ideas at meetings.
- Created responsive design layouts using JavaScript and jQuery, aiding smooth customer experiences.
